Summary

Final-year Electronics and Computer Engineering student at VIT Chennai seeking Software Engineer (SDE) roles, with hands-on experience building and deploying full-stack web applications across the MERN-adjacent stack. Comfortable designing REST APIs, working with relational and NoSQL databases, and deploying on AWS. Strengthening data structures and algorithms fundamentals through consistent practice; Oracle Certified in Java Foundations, currently pursuing AWS Cloud Practitioner certification.

Education

Vellore Institute of Technology, Chennai, Tamil Nadu Aug 2023 – May 2027

B.Tech in Electronics and Computer Engineering; CGPA: 8.02/10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Database Management Systems, Operating Systems, Computer Architecture, Compiler Design, VLSI Design, Microcontrollers

Experience

Full Stack Web Development Intern – EY GDS & AICTE (Edunet Foundation) Feb 2025 – Mar 2025

Remote

- Built Yum Finder, a food delivery platform using Node.js, Express.js, and MongoDB, implementing real-time order tracking end-to-end.
- Designed and documented RESTful APIs and optimized MongoDB queries to reliably handle concurrent user requests.
- Collaborated in a 3-member Agile team, shipping features iteratively across a 6-week sprint cycle.

AI Intern – TechSaksham (Microsoft & SAP, AICTE Edunet Foundation) Jan 2025 – Feb 2025

Remote

- Developed an AI image synthesis tool using Stable Diffusion and ComfyUI for automated visual content generation.
- Improved generation pipeline efficiency through prompt engineering and workflow configuration.

Projects

BuddyUp – React, Supabase, PostGIS, Leaflet, Google Gemini API GitHub

- Built a hyper-local activity-discovery Progressive Web App with live presence tracking, using geohash-sharded Supabase Realtime channels to scale location broadcasting across cities.
- Implemented a flare-based invite system with PostGIS proximity queries and per-flare real-time chat, plus a Gemini-powered AI assistant with live location and flare context.

CloudLab – Next.js, Node.js, Docker, AWS EC2 GitHub

- Built a self-hosted, browser-based coding workspace platform on AWS Free Tier, provisioning isolated code-server (VS Code) environments via Docker containers.
- Developed a real-time dashboard tracking live CPU/RAM usage per workspace, with JWT authentication and an Nginx reverse proxy for secure multi-user access.

HoneyPhish – React, TypeScript, Three.js, OpenAI API GitHub

- Built a gamified phishing-simulation platform with a real-time analytics dashboard tracking key security metrics.
- Integrated the OpenAI API for dynamic, adaptive phishing scenario generation to improve simulation realism.

Technical Skills

Languages: C, C++, Java, JavaScript, SQL

Web & Frameworks: HTML5, CSS3, Node.js, Express.js, React, Next.js, REST APIs

Databases & Cloud: MySQL, SQLite, Supabase, AWS (EC2, S3, Lambda), Vercel, Netlify

Tools & Concepts: Git, Linux, Docker, VS Code, OOP, DSA, Agile, Digital Logic, Microcontrollers

Certifications

- Full Stack Web Development – EY GDS & AICTE, 2025
- AI and Machine Learning Fundamentals – Microsoft & SAP, 2025
- 1Z0-811: Java Foundations Associate – Oracle

Achievements & Leadership

- **Competitive Programming:** Solved 250+ problems across LeetCode, CodeChef, and other platforms (LeetCode Top 25% globally); CodeChef 2-Star (1411 rating); maintained a 50+ day problem-solving streak.
- **Hackathons:** Led 4-member teams at Sparkathon and Adobe Hackathon, securing top-10 finishes in both competitions.
- **Technical Leadership:** Coordinated project teams, conducted code reviews, and delivered technical presentations to cross-functional stakeholders.
